

ICSD Protocols to prevent the spread of infection during international events

(Subject to change depending on changing circumstances.)

Before the Event (before entry)

- Make efforts to understand the host government's quarantine policy and other information provided by the Organising Committee (OC), and strictly adhere to the instructions.
- All participants submit a form committing to follow OC and ICSD Protocols for preventing the spread of infection.

During the Event

- Athletes and staff members with symptoms such as fever (37.5°C or higher), cough, sore throat or headache, fatigue, etc., must report to their team leader and receive medical attention from a doctor designated by the OC. The OC will decide whether or not the persons can enter in the competition venue based on the results of the doctor's diagnosis.
- The athletes must wear masks at all times outside of restricted areas and no food is allowed in restricted areas.
- Staff members other than athletes must wear masks at all times, regardless of where they are.
- All participants should disinfect their hands frequently. Hand sanitiser (alcohol) will be provided by the OC.
- A temperature check will be carried out at the gate of the restricted area and anyone with a temperature of over 37.5°C must be examined by a doctor at the competition venue.
- The Sport Director will decide whether or not a player can take part in the match based on the results of the doctor's diagnosis.
- Athletes and staff members suspended from participating in the Events will be subject to the medical protocols set by the OC.

After the Event (before returning home countries)

- All participants will make the necessary preparations for their return home in accordance with the instructions of the quarantine policy of their respective countries.
